Flex B-20

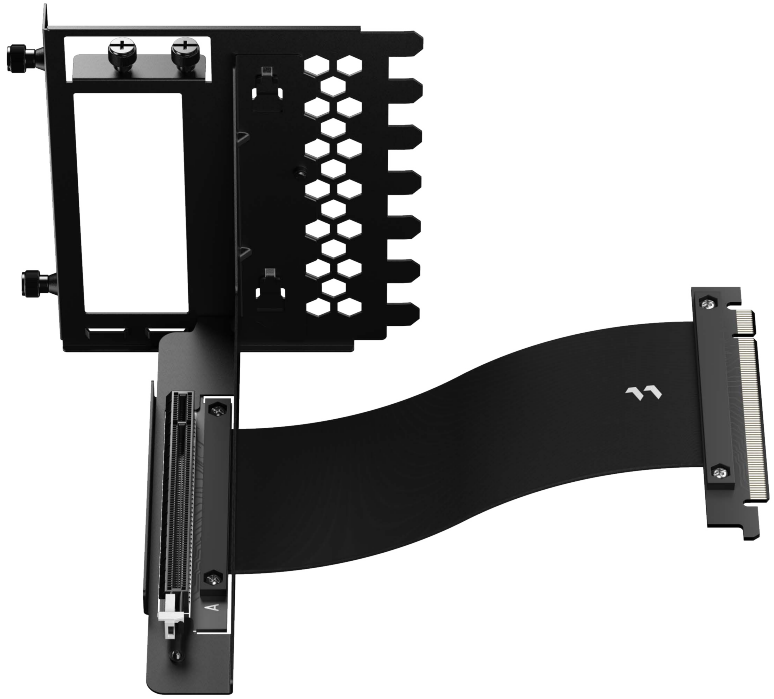
The Rise of the GPU

The Flex B-20 bracket is a great supplement to your case, allowing you to mount your GPU vertically. This makes Flex B-20 an attractive companion to select Fractal cases like the Define 7 and the Define 7 XL.



Key features

- Fits ATX cases with bridgeless expansion slot covers (no bars between slots), such as the Define 7, the Define 7 XL and many others
- Supports full-length GPUs with single or dual-slot brackets and coolers of any size
- Places the GPU away from the side panel
- Mounts easily with included captive thumbscrews
- Full PCIe 3.0 x16 support offering uncompromised performance
- Heavy-duty double-sided wiring delivers up to 3x the power of traditional riser cables (auxiliary power connections are recommended for devices over 40W TDP)
